PROFESSIONAL SUMMARY

Human-centered UI/UX Designer and Developer with 16+ years in the design field. Brings 11+ years of specialized user centered digital experience design and 5 years of focused web design expertise to build intuitive, user-driven solutions.

TECHNICAL STACK & TOOLING MASTERY

- Design & Systems Tooling:** **Figma** (Variables, Component Libraries, Auto Layout, Variants, Work Flows, User flows, Task flows), Adobe Photoshop, Illustrations, In design, Xd, Firefly, Express and Axure RP.
- Design Automation & Token Systems:** **Tokens Studio (Figma Tokens)**, Style Dictionary, JSON token schemas, automated CI/CD(Continuous Integration and Continuous Delivery or Continuous Deployment) design-to-code pipelines (GitHub Actions).
- Front-End Frameworks:** **React** (JSX/TSX, Custom Hooks, Context API), **Angular** (TypeScript, RxJS, Angular Material/Custom Design Systems), HTML5, Tailwind CSS, CSS3, Sass.
- Back-End & API Integration:** **Node.js**, **Express.js**, RESTful API design, GraphQL, JSON Schema validation, Web Socket integration for real-time dashboards.
- Architecture & Handoff:** Git / GitHub workflows, Jira, NPM packaging for internal UI libraries, micro-frontend architectural patterns.

CORE COMPETENCIES

Product Design • UX Strategy • UX Architecture • Information Architecture • Work/User/Task Flows • Design Systems • Sketches • Wireframes • Prototypes • UX Research • Usability & User Testing • Enterprise SaaS • AI Product Design • Accessibility (WCAG) • Agile/Scrum • Stakeholder Management • Cross-Functional Leadership • Generative UI/UX • HTML5 • CSS3 • JavaScript • TypeScript • JQuery Plugins • Node • Express • Angular • React • Lit.js

KEY RESPONSIBILITIES - RESEARCH, SYSTEMS & ACCESSIBILITY

- Plan and execute:** Plan and execute qualitative and quantitative user research, applying AI transcript analysis and competitive intelligence to inform design decisions.
- UX Optimize:** Build dynamic personas and apply AI-driven heuristic evaluation to surface friction points and optimize user journeys.
- UX Principles:** Apply HCI principles and accessibility checkers to ensure WCAG compliance and goal-oriented usability.
- UX & Product Design:** Product Design, UX Design, UX Strategy, UX Architecture, Interaction Design, Design Thinking, Product Discovery
- Research & Validation:** User Research, Persona Development, Journey Mapping, Usability Testing, Heuristic Evaluation, Competitive Analysis, Card Sorting, Contextual Inquiry
- Design Systems & Accessibility:** Design Systems, Design Tokens, Component Libraries, Accessibility (WCAG), Responsive Design, Cross-Browser/Device Compatibility
- Pixel-perfect responsive:** Streamline developer handoff by managing design tokens, component variables, and CSS structure for pixel-perfect responsive execution.
- Code Quality & Technical Alignment:** Conduct code reviews and audit front-end implementations to guarantee design token fidelity, component reusability, and cross-framework consistency between Angular and React codebases.

9. **Accessibility & Performance Standards:** Enforce ARIA, WCAG 2.1 AA accessibility guidelines, optimize client-side rendering performance, and establish UX metrics to minimize user time-to-value (TTV). Proficiency in performance optimization techniques including CSR, SSR, SSG.
10. **MVC, MVVM, Micro Frontends :** Hands-on experience with modern frontend architectures (MVC, MVVM, Micro Frontends) and building scalable, reusable UI components and design systems.

AI (Artificial Intelligence) SKILLS & TOOLS

Core Tools: Figma, Axure RP, Adobe XD, Sketch, InVision, Balsamiq, HTML5, CSS3, JavaScript, jQuery

AI-Assisted Design Tools: Figma AI, Midjourney, Stark, Google Lighthouse, FlutterFlow, v0, Google AI Studio, Uxia (User Testing), UXtweak, Adobe Photoshop, Illustrations, In design, Xd, Firefly, Express, Relume, Uizard.

Coding Tools: Visual Studio Code, eclipse, Cursor, Claude Code.

Platforms: SharePoint, GitHub, Behance, Dribbble

Workflow Automation Platform: n8n

AI Search Engines: ChatGPT, Claude (Anthropic), Gemini, Perplexity, Copilot, Grok (xAI), DeepSeek, Kimi.

UX PROBLEM SOLVING SCENARIOS

1. **Problem:** The MySecureME EMM platform supports bulk device enrollment under a single policy. Having established multiple configuration policies, the next phase requires mapping these feature sets to our managed users and groups..
Solution: The administrator searches for a specific group or user in User Management. A dedicated "Assigned Policies" tab allows them to stack and prioritize multiple configuration profiles onto that user group via a features switch buttons.
2. **Problem:** Orion (Enterprise Data Management) Enterprise clients had messy, inconsistent data (duplicate records, bad master data) spread across 5 modules — Data Migration, Governance, MDM, Customer Master, Vendor Master — with no clear workflow to find and fix errors.
Solution: "The insight was that 'find the error' and 'fix the error' were two separate screens before — merging them into one step-by-step flow is what actually reduced error rates."
3. **Problem:** EHR application when a provider receives a patient appointment request via the Patient Portal, they must manually open Messaging to read the patient's note, switch to Medical History and Diagnoses to understand the context, check Medications and Lab Results for safety, and finally open Scheduling to approve the slot. This constant jumping back and forth causes app fatigue, data entry errors, and need to reduces face-to-face patient time
Solution: The AI automatically scans the 9 modules and extracts *only* the data relevant to that specific request. If the request is for "chronic knee pain," the system surface-links historical Radiology Imaging (X-rays), current Treatment Plans, and relevant Diagnoses, hiding unrelated immunizations or lab results to reduce visual noise.
4. **Problem:** splashBI Enterprise SasS application need to design an intuitive drill-down mechanism for complex charts, enabling users to seamlessly transition from high-level visualizations to granular inner data via dynamic sub-charts or structured tables without losing their workflow context.
Solution: Clicking an interactive data segment (e.g., a specific bar or pie slice) on the master chart does not change the page layout. A contextual Inspection Panel slides out smoothly from the right edge, occupying exactly 40% to 50% of the viewport width. The primary master chart remains completely visible on the left side, keeping the user anchored in their original analytical workflow.

PROFESSIONAL EXPERIENCE

UI/UX Senior Designer | CtrlAltFIX Solutions Pvt Ltd.

May 2025 – July 2026

Project: EMM | Client: SoftClouds & UnfoldLabs | Domain: Device Data Security | mysecureme.com

1. Directed end-to-end UI/UX design for MySecureME EMM, a cloud-based Enterprise Mobility Management platform enabling IT teams to manage Android & iOS device fleets ranging from 50 to 5,000+ devices through a single web console, improving fleet-visibility and device-management workflows.
2. Architected workflows for QR-code device enrollment, cutting manual enrollment steps and enabling instant onboarding at scale, alongside remote security-policy enforcement, app/web access controls, and real-time fleet-monitoring dashboards.

Project: SoftcloudsIT | Client: SoftClouds | Domain: Work Location Tracking & Ticketing Tool | dev.unfoldlabs.com

1. Delivered a real-time employee work-location tracking and IT-support ticketing application, streamlining the balance between remote flexibility and operational accountability for the full workforce.
2. Established role-based UX for three user types (Employee, IT Support, Manager), reducing approval turnaround by simplifying location-request and ticket-tracking flows into a single console.
3. Extended design support across two additional internal products: Softmetrics and UnfoldQuotes Mobile.

UI/UX Designer | Techwave Consulting India Pvt Ltd.

Oct 2023 – Apr 2025

Project: Orion | Domain: Data Management | oriondev.techwave.net

1. Led UI/UX design for the ORION accelerator across 5 core modules - Data Migration, Data Governance, Master Data Management, Customer Master, and Vendor Master.
2. Engineered data-quality workflows and validation tooling that helped enterprise clients identify and resolve data errors, improving data consistency and completeness by an estimated 20–30%.

Client: Company owned product | Domain: B2B Travel Agency | next.grnconnect.com

1. Delivered desktop and mobile design systems in Figma for GRNconnect, a B2B hotel, apartment, activity, and Eurail booking platform serving global travel partners across 50+ screens.
2. Designed hotel search, booking, transfer, and guided-tour flows spanning 4 core service lines, plus a companion Fintrust mutual-fund mobile application.

UI/UX Designer | Edvak Health Pvt. Ltd.

Jan 2022 – Feb 2023

Project: Electronic Health Record (EHR) | Domain: Health Care | edvak.com

1. Designed an AI-powered Electronic Health Record and Practice Management platform, integrating patient appointment requests, secure document sharing, and a self-service Patient Portal used by patients and providers.
2. Created interfaces across 9 clinical modules — medical history, scheduling, messaging, diagnoses, medications, treatment plans, immunizations, radiology imaging, ICD, CPT Codes and lab results simplifying provider workflows.
3. Collaborated with engineering (Developers) teams to inspect, edit, and refine Angular billing modules, ensuring design fidelity, responsive layouts.

UI/UX Designer | Sancara Shampad Pvt. Ltd.

Jul 2020 – Jan 2022

Project: Electronic Health Record (EHR) | Domain: Health Care | clinistats.com

1. Designed an EHR platform with an integrated Patient Portal and analytics to support provider clinical decision-making.
2. Built Dashboard, Admin, Patient, and Provider modules covering registrations, SOAP notes, scheduling, coding, and billing.

UI/UX Designer | Splash Business Intelligence Pvt. Ltd.

Apr 2018 – Mar 2020

Project: Business Intelligence Tool (BI) | splashbi.com

1. Designed a data-reporting and business-intelligence tool, giving enterprise users instant access to reports, visualizations, drilldown chart and analytics across disparate data sources. Splash BI is a Data Reporting Tool.

2. It helps organizations make the very best business decisions by providing instant access to data from disparate systems in the form of reports, visualizations & analysis.

UI/UX Designer | BVM Consultancy Services Pvt Ltd.

Apr 2015 – Apr 2018

Project: GST, Education, IT | Domain: Finance, Education | bvmcs.com

1. Designed and developed GST billing and accounting software UI, plus CMS and website products for the education sector.
2. Product UI/UX designs and develops custom applications to meet our client's needs & objectives. GST Billing and Accounting Software, CMS & Website services and discover the right education Institutes in India.

UI/UX Designer | Bravemount Company Pvt Ltd.

Oct 2014 – Feb 2015

Project: Dogalize | Domain: Social Network

1. Designed responsive websites and web apps, including a social-networking platform for dog owners, improving overall usability and visual design. Developing custom software products from responsive websites to web apps.
2. The company provides services like Static apps, Dynamic Apps, ecommerce, CMS, Portal Development. Improve customers' overall satisfaction with a fresh and modern user interface.

UI/UX Designer | Vensoft

Feb 2013 – Jul 2014

Projects: Campnavigator, Cinesprint, SQLlabs | Domain: Social Network, Camps, News | vensoft.com

1. Delivered application UI/UX for IT-services clients across Financial Services, Communications, Retail, Manufacturing, and Travel sectors.
2. IT Services Provider. Application Development & Maintenance Service. Intelligent IT solutions to clients in the Financial Services, Communications, Retail, Manufacturing, High-Technology, Travel and Transportation and Public Sector industries.

UI/UX Designer | Wisdom IT Services Pvt Ltd.

Jul 2011 – Feb 2013

Project: Wisdom Jobs | Domain: Web Applications, E-Commerce | wisdomitservices.com

1. Designed UI/UX for a leading employment platform serving job seekers across India, the Middle East, and North Africa. An employment website operating in India, Middle-East & North Africa region.
2. It claims that it is one of three major job portals and which supposedly provides skill-tested and assessed job seekers and Resume writing, Resume Forward etc services provider.

UI/UX Designer | Athensys Technology

Feb 2010 – Jul 2011

Projects: Veris Consulting, Askolivia | Domain: Web Applications, E-Commerce | athensys.com

1. Designed responsive websites and web applications spanning static/dynamic apps, e-commerce, CMS, and portal development.
2. Developing the custom software products from responsive websites to web apps. The company provides services like Static apps, Dynamic Apps, ecommerce, CMS, Portal Development.

UI/UX Designer | Aivah Advanced Web Solutions

May 2008 – Feb 2010

Projects: ThemeForest, Envato | Domain: Web Applications, E-Commerce | aivah.com

1. Designed WordPress-standard themes for the Envato marketplace, plus web application and e-commerce interfaces.
2. Aivah focuses on web applications, programming, e-commerce solutions, web designing and other print related services. Create hassle free themes Coded with Word Press Standards.

UPSKILLED CERTIFICATIONS VIA UDEMY

1. How to Design for UX Accessibility
2. UX Audit + UI Redesign
3. Emotional Intelligence
4. UX Strategy Fundamentals
5. Object Oriented UX Fundamentals
6. Introduction to UX Writing
7. Effective Communication in the Workplace
8. Mastering Generative AI for Developers

EDUCATION

MSc(Physics) — Acharya Nagarjuna University CDE, Guntur, Andhra Pradesh (2006)
